

Which Picture Am I Describing?

Classroom-ready printable pack · Grades 3–8

Pack contents

original related-symbol sets in three difficulty tiers Two student sets are included.

Teacher directions

1. Give partners identical card sets and organizer mats; keep the model or rule hidden from the Builder.
2. The Describer selects a sample or creates curriculum-specific content on the write-in blanks.
3. Communicate the words, relationships, order, or rule without revealing the finished arrangement.
4. Compare, cite the clue that resolved each choice, and revise ambiguous language.

Before class

- Print at 100% on US Letter paper. Use cardstock or laminate for reuse.
- Cut on the thick solid borders. Keep Set A and Set B separate.
- Give challenge/model cards only to the Describer.
- Use a folder, book, or tabletop barrier so partners cannot see each other's work.

Accessibility and accommodations

Read cards aloud or use text-to-speech; reduce the set; preteach key words; allow pointing to a language strip. Text is paired with symbols/patterns, and write-in blanks permit local reading-level adjustments.

Storage-envelope labels

Which Picture Am I Describing?

Set A — Describer

Count pieces before storing.

Which Picture Am I Describing?

Set B — Builder

Count pieces before storing.

Which Picture Am I Describing?

easy: one large star

Challenge 2

medium: two stars above a square

Challenge 3

hard: striped circle overlaps triangle

Challenge 4

expert: mirrored symbols with one difference

Which Picture Am I Describing? reference

Language and answer-key guidance

Sample sets are original, short, and intentionally controlled. Use the exact sequence or relationship printed on the Descriptor card as the sample key. When teachers use blanks, create and retain a matching reference before class. Accept synonyms only when they preserve the intended relationship.

Review locally added content for reading level, cultural fairness, copyright, and unambiguous answers. Do not use copyrighted characters or passages.

Quality check after a round

- Can each student identify pieces by shape or label without relying on color?
- Do both models match in pieces, order, orientation, and relative position?
- Which direction was most precise? Which should be revised?
